DMR Bridge @SM5GXQ

- SvxLink Talk group 2405174 is SM5GXQ's individual Talk Group. It's automatically activated on SM5GXQ's SvxLink Node.
- This talk group may also be activated from elsewhere on SvxLink.
- Now, the DMR bridge is activated, to bridge the traffic to DMR talk group 2405174.
- DMR nodes monitoring 2405174 can now hear local FM traffic from SM5GXQ and SvxLink talk group 2405174.
- The bridge may also be activated from DMR, just by transmitting on talk group 2405174.

DMR Bridge @SK7RFL

- SvxLink Talk group 24078 is used to bridge SK7RFL and SK7RN repeaters together.
- Now, the DMR bridge is activated, to bridge the traffic to DMR talk group 240721.
- DMR nodes monitoring 24071 can now hear local FM traffic from Öland.
- The bridge may also be activated from DMR, just by transmitting on talk group 240721.
- From SK7RFL DMR Repeater, the bridge may be activated from talk group 6.

Svx Portals

SvxLink – Multiple Reflectors

- Reflector **"SE"** [Swedish](#) National Reflector.
- Reflector **"UK"** ["International"](#) reflector in England (G4NAB).
- Reflektor **"DE"** ["Funknetz.de"](#) reflector in Germany.
- Reflector **"SK7RFL"** Local Reflector at the Repeater.
 - Used for incoming EchoLink and DMR connections.
 - May be used for emergency traffic, when the repeaters are not connected to the networks.
- SK7RFL, SK7RN, SK5BN, SM5GXQ are connected to **SE**, **UK** and **DE** reflector networks.
 - They do not monitor any international talk groups with heavy traffic load.
 - There is no direct bridging between the reflectors.
 - SM5GXQ Simplex node monitors (more) international talk groups.
- Normally only one reflector is active at the same time.
 - No "leakage" between the networks.
 - Same talk group numbers in use in both networks. They are not necessarily bridged.
- All talk groups can be activated as usual with DTMF.
 - The repeater "knows" which reflector to use.
- Talk group numbers are announced with:
 - **"Talk group"** for the Swedish Reflector.
 - **"UK"** for the English (international) Reflector.
 - **"DE"** for Funknetz.de.
